BRING THE CELEBRATION HOME

ACROSS THE LANDSCAPE FROM THE LILTING SEASIDE
TO THE CITY CHIC & THE HILLS OF HOLLYWOOD

One's trash, another's treasure

Japanese designer Kosuke Araki swears by the motto 'why waste what can be used'. He uses leftover food to craft Anima, a line of sleek, all-black tableware. Food waste including rinds, peels, calyces, shells and bones were collected and processed with the addition of Urushi, a Japanese lacquer, to produce cups, plates and bowls. GREEN ALERT

Sustainable solutions for a happy and healthy planet

PRODUCED BY **AKSHITA BHANSALI**

NURTURE NATURE

Beirut creative Richard Yasmine imagines Wake Up Call, a series of lamps with sandblasted bulbs resting on birds nests, a brass structure and semi-precious rocks. The collection highlights climatic changes and promotes protection of the environment.

EMBRACE THE WASTE

London designer Charlotte Kidger's project Industrial Craft utilises waste plastic, giving the lightweight polyurethane foam dust left behind after the milling process a new life by transforming it into intriguing furniture pieces. The thought behind the innovative designs was to find ways to repurpose the undervalued and problematic material and convert it into aesthetically appealing objects.
